### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: None of the previously relied upon prior art teaches or fairly suggests a cured silicone powder having the limitations of instant claim 1. Specifically, Morita et al. (US Pat. 5,945,471), believed to be the closest prior art document teaches only a cured silicone powder having an inorganic powder adhered thereto. There is no teaching or suggestion to further treat the inorganic powder-coated silicone powder with a surfactant. The previously applied secondary references do not provide any relevant motivation for coating the inorganic layer with a surfactant. Specifically, Regan (US Pat. 5,472,493) only teaches a surfactant modified **silica** powder, not a surfactant modified **silicone** powder. Further, the motivation to add such a surfactant to the silica powder as taught by Regan is to increase the dispersability in **aqueous media**, while Morita et al. is interested in improving the water **repellency** and dispersion in **organic resins**. Therefore, based on the collective teachings of Morita et al. and Regan, a person having ordinary skill in the art would have not found it obvious to arrive at the instant claimed invention since the end uses for the particulate compositions differ significantly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
